EFI. ORDER SYSTEMS

What is the difference between EFI.TOWER and other vending machines?

EFI.
ORDER
SYSTEMS

SMART. EFFICIENT. EFI.

1

Individual compartment size

The carousel configuration is made based on necessary products

2

Simple implementation

The format and data transfer are individually configured - XML, Idoc, edifact, csv

3

Low investment costs

We provide better functionary for a lower price

Starting at:
16.900 €

4

Timesaving refill

Time equals money- this process should not be undervalued

Individual carousel configuration

01   From 5 x 5 cm up to 20 x 20 cm

The carousel is build based in product size

02   Up to 2.000 compartments

A common layout of small, medium and big compartments can reach an average of 800

03   Free arrangement of sizes

The withdrawal from the small compartments in the upper area is easier

Enhanced control by withdrawal traceability

01   Access control with RFID/NFC

Various reading modules available: HITAG, Mifare, Legic, etc.

02   Detailed Access right control

By department, by user, by material group, etc.

03   Budget levels on value and quantity

Ex.: 2 pieces a day or 250 € per month

04   Key management

Integrating other storage spaces by depositing the access keys

Increased transparency

01 **Individual reports**

NBy cost center, product category, user*

* Can be encrypted in the data base

02 **Automatic transmission of reports**

Just define who, when and what information they receive

03 **E-Mail information**

Every action , for example a withdrawal, can generate an e-mail

**04** **Documentation**

Full traceability of products

Easy & fast withdrawal process

SMART. EFFICIENT. EFI.

Card connection access	Web-catalog search for items	Inserting the required quantity	Product withdrawal

Even more flexibility with the EFI.Box

01   Uninterrupted processes at each workstation

Similar functionality to a vending machine – at a fraction of the costs (RFID/NFC authentication, quantity insertion, withdrawal)

02   Mobile use in the whole plant

For reduced consumption locations or for deliveries on site

03   No aditional storage space

Existing storage space is sufficient

04   Box exchange - they do not refill on site

Empty boxes are replaced with full ones

Flexible connection to the ERP or directly to the suppliers

01 Various formats accepted

XML, Idoc, EDIFACT, CSV, TXT
02 Various transmission methods

E-Mail, FTP-Server, SFTP-Server, Webservice, ucm.

Overview of
your advanteges

01   Reduction of ways

02   The consumption decrease

03   Enhanced budget control

04   Decrease of storage costs

05   Availability (24/7)

06   No interface programming

07   Data transmisson via LTE

08   Integration of various EFI-Systems

09   Only one partner

10   Experienced project team
